HOW YOU CAN STRENGTHEN YOUR IMMUNE SYSTEM *and Regain Your Health...Even From Dreaded Diseases NOW!*

©2009 Beverly Nadler, CHT, CMT, Speaker, Author, Trainer, Reprogramming Coach

If there is a way to *quickly* stimulate your body to *strengthen your immune system* so you can *prevent* contagious infectious bacterial or viral diseases – would you want to know about it?

If there is a product that is *clinically proven* to help your body produce what it needs to *prevent* and even *heal* from chronic debilitating diseases, including the most dreaded ones – cancer, leukemia, MS, Parkinson's, lupus, Alzheimer's, dementia, heart disease, stroke, diabetes – with *NO unpleasant or dangerous side effects*, would you want to know about it?

What if this product causes your body to produce a vital substance that repairs and maintains healthy DNA, *increases longevity* and has ANTI-AGING effects?

What is this product has *clinical evidence* that it helps your body produce what it needs to *heal from* infectious diseases, including AIDS, hepatitis, herpes, and deadly infections such as those that result from “bed sores” (pressure wounds)?

What if the 2008 recipient of Nobel Prize for Medicine and co-discoverer of the HIV virus, Dr. Luc Montagnier, is so impressed with this product and its effect on *oxidative stress* that he devotes an entire chapter to it in his \$249.95 book, “*Oxidative Stress in Cancer, AIDS and Neurodegenerative Diseases?*” Would *that* motivate you to want to know more about it?

What if this product has more than 70 world-wide patents, including (and not limited to) method of use for treating cancer, enhancing immune system response, exerting anti-cancer effects, and method of use in treatment of HIV?

What if this same product gives your body what it needs to *detoxify* and *repair the damage* caused by free radical damage, stress, environmental pollution, poor diet, drugs, radiation, infection, injury, burns and other trauma?

What if this product could stimulate your body to increase its production of a *vital cellular component* that could *PREVENT* those conditions, and also *prevent and/or heal* asthma, rheumatoid and osteoarthritis, ulcerative colitis, fibromyalgia, skin conditions, allergies ... and almost any other condition you could think of, and ones you don't even know exist -- not to mention the different varieties of flu and the very annoying common cold, would you want to know about it? (*Don't see the condition you're concerned about? See extended list on page 12.*)

What if research studies with this product show *exciting results* for Autistic children and adults and children with ADHD?

Suppose this product was a very expensive drug with negative side effects (*all* drugs have negative side effects), would you *STILL* be interested? You probably would be. In fact, people would line up for miles to get this amazing drug, *IF IT EXISTED*, wouldn't they? But it doesn't!

Suppose I told you that there is a *natural product* that does this? A natural product that stimulates the cells of your body to produce a vital substance that helps prevent disease, promotes healing, and maintains health. A product that is *so safe* that pregnant women take it, nursing women take it, and when they stop nursing, mothers feed it to their infants to continue to strengthen their infants' immune systems...would that interest you?

Suppose I told you that the *only* "side effects" of this non-drug are better health and a potential *30% increase in longevity* (life span) as shown by clinical research?

Would THAT interest you?

I certainly hope so -- because the product DOES exist!

Before I continue, I need to ask you a few important questions...

ARE YOU WORRIED ABOUT ANY OF THE FOLLOWING?

- *Cancer?*
- *Alzheimer's or Dementia?*
- *Swine Flu or other Infectious Diseases?*

- *the possibility that a painful and/or dreaded disease (Parkinson's, fibromyalgia, MS, ALS, etc.) will "attack" you or a loved one?*
- *heart disease or stroke?*
- *any of the conditions on the previous pages?*
- *the new United States health plan?*
- *the health care crisis?*
- *limited or no health insurance (really "sickness" insurance)?*

WELL...STOP WORRYING!

There is protection for ALL of the above – a body with A HEALTHY IMMUNE SYSTEM that also fights free radical damage and eliminates toxins efficiently!

Before I continue, I want to give you information about the human mind and tell you *why* people *ignore* vital life-changing information, *even if they have a serious health challenge*.

NOTE: If you are **not** interested in the following information on how the mind works and why it ignores essential information, my background and my healing from cancer, startling disease statistics and research on iatrogenic (medically-caused) disease, some things that *over time* help strengthen your immune system, how this extraordinary product was discovered (including the years of research and millions of dollars spent), and you **ONLY** want to know more about this product and how it can help you -- *and you want or need this information **immediately***, just skip the rest of this page and go directly to page 11.

Why do I say you could read this and do absolutely nothing? Because you, and every other human being, have what psychologists call a "**critical faculty**" in your mind that does **not** allow *new information*, especially information contrary to popular opinion and your "conditioning," to penetrate.

And unless the new information penetrates through the "critical faculty" between your **conscious and subconscious** mind, you will not be motivated to take any action -- *no matter how logical and important this new information may be*.

This is **WHY**, even when people are exposed to valuable information that can make a huge difference in their health and their life, they **do nothing** with the information. Instead, they continue to carry out their old habits and behaviors -- *even when they know these habits and behaviors are detrimental to themselves*

and/or others. It is also why people continue to prefer dangerous drugs to natural products, even though drugs and medical errors are the 3rd leading cause of death!

So...now I will do my best to give you enough background information to get past the “critical faculty” of your mind. I urge you to read this entire Report.

First -- my own personal healing experience...

If you are familiar with my work and/or are a subscriber to my “Live Your Vision” Newsletter, you know that for many years my primary focus of attention and teaching has been on personal development and spiritual growth.

Some of you know that I healed from cancer using natural methods in 1994. I had surgery to remove the large tumor, and after the operation the stunned surgeon told me he had never seen anything like this in his life because *the tumor he removed was totally DEAD*. In other words, my healing took place *before* the surgery!

How did that happen? The surgeon was not even curious, and he wanted me to take chemotherapy and have radiation because it was “protocol.” I declined. I knew why the tumor was dead; it was dead because I used everything I knew about healing on all levels – physical, nutritional, mental, emotional and spiritual. Everything I did is in my “Dynamic Self Healing” Manuals”
http://www.beverlynadler.com/html/dynamic_self_healing.html.

After writing “Dynamic Self Healing” I did not intend to continue teaching the physical and nutritional aspects of health and healing.

In spite of having healed from cancer, and my over 30 years of study and experience in nutrition and holistic health, I had come to the conclusion that there are enough people teaching these subjects, so my input was not necessary. Therefore, I could focus on Universal and Mental Laws, subconscious programming, personal development, spiritual growth and expansion of Consciousness. (Of course, all of these contribute to health and healing because we are “holistic” beings.)

Having made my decision, my first website www.beverlynadler.com had no health and nutrition information, except one article on Holistic Health. It was only a few years ago that I began to write and post nutrition articles on the site, on this page <http://www.beverlynadler.com/html/nutrition1.html>.

Why did I change my mind?

Because, in spite of the enormous amount of information on natural health and healing that is available, **health in the United States and other “civilized” countries is not improving; it is declining.** *27 other countries exceed the United States in healthy life expectancy. And out of over 150 countries, 38 countries have lower infant mortality rates than the United States.*

Because of the mental “conditioning” (programming) of the public, together with constant repetitive drug advertisements and junk food promotion, not enough people use or are even aware of natural health care, including preventative measures. Most people just rely on drugs, in spite of their known dangers.

According to William Campbell Douglas II, MD, there is “*a mental lapse affecting adults who see Big Pharma's drug ads. A new study shows that 41 percent of Americans mentally tune out when the voiceover begins its rhythmic chant... sideeffects may include nausea heartburn diarrhea brain damage kidney disease terrible gas fever incontinence...*” He goes on to say, “*these ads aim to engage you in self-diagnosis -- inspiring you to visit the doc when you normally wouldn't, and with a drug already in mind.*”

As I considered the decline of health, the tremendous cost of illness in money and peace of mind, and the enormous amount of confusing information and misinformation out there, I decided to re-think my decision about what I would teach and I added more health and nutrition articles. I also recently created a new website www.breakthroughhealth.net with additional health information, and I have now begun to write Health Reports.

As important as knowledge of the Universal and Mental laws that govern our lives is to your health, success and happiness, when you're physically and emotionally sick and suffering, or when beloved members of your family are, it is *almost impossible* to make personal development and spiritual growth a priority.

Shocking statistics on iatrogenic disease...

Before writing this Report I did on-line research and was shocked at many of the statistics I discovered. Among the most disturbing are the statistics about iatrogenic (drug and medically induced) disease. I'm reporting some of them in the hopes that you'll see the importance of strengthening your immune system immediately *so that you can avoid hospitals and drugs as much as possible.*

According to information on the website of The Committee to Reduce Infection Death (RID) <http://www.hospitalinfection.org/>, hospital infections kill **103,000** people each year in the US – *more than die from AIDS, breast cancer and auto accidents combined!*

According to <http://health.groups.yahoo.com/group/iatrogenic/message/1451>, In-Hospital Deaths from Medical Errors are at **195,000** per year. (I discovered that website while researching on the American Iatrogenic Organization site <http://www.iatrogenic.org/>)

As scary as these numbers are, the figures of popular nutrition and health researcher and advocate, Gary Null, are much worse. He estimates annual deaths from all causes of iatrogenic disease to be **999,936** (Source: “Death by Medicine” Table 2 – “Estimated Annual Mortality and Economic Cost of Medical Intervention”). You can read a lot about iatrogenic disease on this page on Gary’s site <http://www.garynull.com/GNarticles.php>. Scroll down to “iatrogenesis.”

What causes iatrogenic disease? Many things. Here are some of them: wrong diagnosis, which leads to the wrong treatment; hospital infections; fatal drug reactions and drug errors in and out of the hospital caused by wrong prescriptions or wrong dosages; severe drug reactions even when the “correct” drug and dosage is prescribed; improper or unnecessary surgery, and other medical mistakes.

Though statistics vary from source to source, the conclusion is clear: **Iatrogenic disease is the 3rd leading cause of death in the US and North America**, behind heart disease and cancer.

Am I telling you all this to scare or worry you?

NO! I’m telling you this so that you will understand *why* you want to make it a priority for you and your family to avoid being among those tragic, unnecessary, statistics!

Of course, there are times when medical intervention is necessary, even crucial, and I’m grateful that modern medicine exists, especially for necessary surgery and crisis situations. However, when you have a strong healthy immune system, and a body that detoxifies itself and is able to avoid and repair itself from free radical damage, you have LESS dependence upon hospitals and drugs.

With all the conflicting information and misinformation that bombards us on the internet, in magazines and on TV and radio, health and nutrition have become overwhelming subjects. This is especially true for people who can't or do not want to spend their life researching and integrating this kind of material. In fact, it can be so overwhelming and confusing that instead of people being motivated to take care of their health, it seems that they just give up in frustration and do nothing.

I kept wondering if there was anything I could do to help change this situation.

The desire to write this Report originally came as a direct result of the dire predictions of the Swine Flu Pandemic and the even more dire reports on the dangers of the vaccination. I kept thinking ***“If only people would strengthen their immune system.”***

Well, the Swine Flu “scare” may be over for the present, but the challenges of ill health, debilitating disease and premature death continue.

A strong immune system is the result of integrating many factors – physical, biochemical, mental, emotional and spiritual. However, there isn't enough time for people with compromised immune systems, or with cancer or other dreaded diseases, to integrate all these factors. So I asked myself...

“Is there ONE thing, above all others, that most people can do, that would have the most immediate and powerful impact upon their immune system?”

The answer is YES! This Report is the result of that question.

But before I tell you the ONE thing, above all others, that you can do that would have the most *immediate* and *powerful* impact upon your Immune System, let me tell you **some things that help strengthen your immune system**

It's no surprise that the same things that enhance your general health also help strengthen your immune system, *as long as they are done or taken consistently over time*. These include the following:

Chiropractic care, acupuncture, massage therapy, healthy organic foods, certain herbs, certain plants, fruits and vegetables (especially those containing chemical compounds called “phytochemicals”), antioxidant nutrients, spirulina, chlorella, blue-green algae, friendly flora, digestive enzymes, detoxification products, essential oils, laughter, feeling spiritually connected, chanting, meditation, yoga,

Pilates, Tai Chi, Chi Gong, exercise you enjoy, a positive attitude, feeling gratitude and appreciation, certain breathing exercises and “energy psychology” techniques. Certain subliminal CDs/tapes, doing creative activities, certain music and sounds, specific vibrational frequencies, certain little-known technologies that use magnetic energy or micro-currents, being joyful, doing what you love, giving and feeling love, being in a “nature” environment, reducing your level of stress, reducing your intake of processed, chemicalized foods and drinks. And there are others, some of which are, or will be, the subject of other Health Reports. Some will be on my websites. These are all beneficial for your health and they all help strengthen and protect your immune system.

However -- and this is a very important “however” -- you can do *all* of them, and as beneficial as they are, NONE of them will have an *immediate* impact upon your Immune System...not even if you do *ALL* of them together!

They don’t work quickly enough, nor are they sufficient for building resistance to infectious conditions and healing from serious debilitating, life-threatening illness -- *unless* your body produces enough of the vital substance that can **ONLY** be manufactured *by* your body, *in* the cells of your body – **glutathione/GHS**.

And there is only ONE product that is proven by years of clinical research to stimulate your body to immediately produce glutathione – it’s called Immunocal.

I consider Immunocal (once known as HMS90 in Canada) to be one of the (if not **THE**) *most important* natural nutritional supplements on the planet. And I don’t make that kind of statement lightly.

Immunocal was developed as the result of tireless research by an extraordinary and compassionate scientist, Dr. Gustavo Bounous, MD. It took 18 years and over \$20 million dollars, half of which came from the Canadian government, before this exceptional supplement came to the marketplace. The company that produces and markets Immunocal is **Immunotec**, a Canadian company that originally incorporated as Immunotec Research. The company changed its name, but their research is continuous and on-going. (Immunocal now has over 30 years of research behind it.)

Immunocal has only been available to the public since 1996. And even today, very few people, including most doctors, even know it exists. One of the fortunate few who learned about Immunocal some years ago is Rene Angelil, Celine Dion’s husband. His oncologist knew Dr. Bounous, who was then Immunotec’s Director

of Research. Rene used Immunocal and the rest is history. He healed from prostate cancer and now he, Celine, and their families take Immunocal to *prevent disease and maintain health*.

What is Immunocal and what does it “do” in the body?

Immunocal is a totally unique natural nutritional supplement. It is not “similar to” any vitamin, mineral, herbal or enzyme supplement. It is not meant to replace vitamins, minerals and enzymes that provide necessary nutrition. It is a whey protein isolate -- not to be confused with whey used in protein drinks – and is a *lactose-free*, tasteless white powder that mixes in liquid, and is safe for people who are lactose-intolerant or allergic to milk.

Because Immunocal is not a drug, no health claims can be made for it. The **ONLY** claim we make is that it provides your body with the ingredients needed to increase its production of glutathione. And it does this *naturally* and with no side-effects.

Though it is not a drug, every year since 2001, Immunocal has appeared in the prestigious **PDR** (Physicians’ Desk Reference) that is distributed to American Physicians and Pharmacists. And as of 2009, Immunocal also appears in the equally prestigious **CPS** (Compendium of Pharmaceuticals and Specialties) that is distributed to Canadian Physicians and Pharmacists.

When Dr. Gustavo Bounous began his research decades ago, there was no knowledge of glutathione, not even the “name.” Now there are over 100,000 research articles telling about its extraordinary health benefits, and the number continues to grow. While many things are essential for the health and optimal functioning of the approximately 75-100 trillion cells in your body, *nothing is more important to your health and longevity than glutathione*.

There are no vitamins, minerals, herbs or other supplements that provide the ingredients necessary to increase your body’s glutathione production. There may be products that “claim” to do this -- but Immunocal is the *only* natural product with multiple world-wide patents that is *clinically proven* to increase production.

What is glutathione/GHS and why is it so important?

Glutathione is a vital component of all the cells in your body, and has approximately 30-40 functions. It’s manufactured by your body in each cell and its purpose is to protect you at the *cellular level*. When glutathione production is

adequate, it repairs your DNA and protects your body's cells. When production is not adequate, this cellular protection is compromised, and the cells in the organs and systems where you are most vulnerable become abnormal.

Without enough glutathione production taking place in your body, it's impossible to be truly healthy. Even worse – depending on your susceptibility, you can develop Cancer, AIDS, heart disease, stroke, herpes, diabetes, fibromyalgia, asthma, emphysema, rheumatoid or osteoarthritis, MS (multiple sclerosis), cerebral palsy, Parkinson's, Alzheimer's, dementia, Lou Gehrig's disease (ALS), allergies, environmental sensitivity, psoriasis, eczema, acne, gout, macular degeneration, hepatitis, Epstein Barr, Chronic Fatigue Syndrome, ulcerative colitis, Crone's Disease, lupus, shingles and other auto-immune diseases, serious microbial infections...and other painful and/or dreaded diseases. The list is almost endless.

How does glutathione/GHS protect us from disease?

Of glutathione's 30-40 different functions, the first four below are possibly the most significant (Remember AIDE)

- Glutathione is the **MASTER Antioxidant** -- your body's most powerful antioxidant -- and it works with other antioxidants to fight free-radicals that oxidize your cells (called oxidative stress). Thus, glutathione prevents and reduces oxidative stress.
- Glutathione strengthens and normalizes your **Immune system**. (To understand why nothing is more important to your immune system than glutathione, see "*How glutathione strengthens and normalizes your immune system,*" below.)
- It is your body's main **Detoxifier**. Glutathione cleanses the cells of your body and flushes waste and toxins out of your system. The highest concentration of glutathione is found in the liver, your primary detoxification organ. Glutathione binds to heavy metals (associated with Parkinson's and other diseases), chemicals, solvents, pesticides and other toxins and helps your liver detoxify and remove them so they can be excreted in urine or bile. Glutathione's cleansing function is vital for your organs of detoxification, especially your liver and kidneys.
- Glutathione contributes to your overall **Energy**. The major source of energy produced in our cells comes from tiny structures called *mitochondria*,

considered to be the “powerhouses” of the cells. These mitochondria would literally burn up without the presence of glutathione.

- It plays a crucial role in maintaining a *normal balance* between oxidation and anti-oxidation – a balance that is essential for the regulation of many body functions, including the repair of DNA, synthesis of proteins and activation and regulation of enzymes.
- It prevents and reduces systemic *inflammation* which is now recognized as a leading cause of degenerative and catastrophic diseases. While certain drugs and supplements are supposed to stop inflammation, most supplements don’t work well and all drugs have dangerous side-effects. (Many deaths resulted from Vioxx, and the company is in a class action suit.)

How glutathione strengthens and normalizes your immune system

Our complex immune system defends our body from foreign invaders that can endanger our health and wellbeing. Actually we have two immune systems – our innate immune system that we’re born with and our adaptive immune system that results from what we do to strengthen our immunity. Among the many components of our immune system(s) are our thymus gland, white blood cells, B cells, and T cells. Many diseases result from a weak immune system. *Glutathione strengthens a weak immune system and is essential for the replication of your white blood cells, B cells and T cells.*

Some diseases are “auto-immune” diseases. That’s when your immune system attacks its own cells, mistaking them for foreign invaders. (You might say the immune system is “out of control.”) Lupus, shingles, rheumatoid arthritis and MS (multiple sclerosis) are examples of auto-immune diseases, and there are others. Whether you are “immune-deficient” or have an auto-immune disorder, *glutathione will balance your immune system(s).*

In other words, glutathione, which is produced in every cell of your body, is *an immune system “normalizer.”* When your body produces *enough* glutathione -- whether you are immune-deficient (have a weak immune system) or have an auto-immune disorder -- **each cell knows exactly what to do to restore your health.**

What happens when your body doesn’t produce enough glutathione?

Your body is unable to effectively fight free radical damage and prevent oxidative stress that leads to inflammation and serious illness, even if you take

large quantities of antioxidants. That's because antioxidants *need glutathione* to do their work. As the master antioxidant, glutathione recycles other antioxidants, such as vitamins A, C and E, thus keeping them in an active state longer. (*NOTE: Later you'll read more about how glutathione does this, and you'll read about recent surprising concerns some researchers have about antioxidant supplements.*)

Free radical damage (cellular oxidation) is recognized as a cause of, or contributing factor to, degenerative diseases including cancer, Alzheimer's, arthritis, heart problems, MS, Parkinson's, macular degeneration (to name a few), and physical and mental changes called "aging." It's no coincidence that stress is recognized as a major cause of disease and premature aging, because *stress* -- whether physical, chemical, mental, emotional or spiritual -- *bombards us with free radicals*, which means our body *must replenish* its glutathione.

Your body can't efficiently eliminate toxins you inhale, ingest and absorb every day from the air, food, water and environment. Good detoxification at the cellular level is essential for good health, and particularly important for people who took drugs in the past that were later taken off the market because of their life-threatening side-effects, or had exposure to dangerous chemicals such as asbestos and pesticides, or anyone who lived, worked or volunteered in the vicinity of Ground Zero in NYC, after 9/11. Fortunately, detoxification can often be successfully accomplished even years after exposure.

Your immune system is weak and you are vulnerable to disease because glutathione is necessary to produce the B and T cells your immune system needs in order to fight disease. This includes viral and bacterial, as well as chronic, painful debilitating diseases. Our bodies contain billions of microbes (we call them germs), and people with weak immune systems are frequently ill with "minor" problems – colds, sore throats, ear infections, etc.

While people with strong immune systems resist viral diseases and microbial infections -- including AIDS, Herpes, Mad Cow disease, e-coli infections and other food-harbored microbes and various strains of the flu, including the Swine flu (not to mention the very annoying common cold and sore throat) -- those with weak immune systems are susceptible. *Even Louis Pasteur, on his deathbed, recognized that "germs" don't cause disease; rather it is "the host" -- the individual's body and level of resistance.*

People with weak immune systems are also vulnerable to chronic, degenerative, and life-threatening diseases, especially if their body has a great deal of toxins and

free radical damage. And people with unbalanced immune systems suffer from painful, often crippling, auto-immune diseases. Our body is able to avoid or heal from these conditions, IF it has enough glutathione.

Young children, including babies, do not always manufacture enough glutathione. Autistic children, for instance, and children who are frequently sick, are deficient in glutathione. Immunocal contains no lactose and is safe, even for infants.

Could *lack of glutathione* be one major reason why so many degenerative, debilitating life-threatening diseases are on the rise all over the world?

Sounds like a simple explanation, doesn't it? Too simple, you say? Well, it took a lot of deaths before it was discovered that scurvy, a once deadly disease, was caused by lack of vitamin C. And a lot of women had to die before doctors agreed to wash their hands before delivering babies, thus wiping out childbirth fever.

Important: *If you are inclined to scan this Report and skip pages as you read, be SURE to click the **video testimonials link** on page 21. If CANCER is your concern, you MUST read page 24.*

How does your body produce glutathione?

The three proteins it uses are glycine, glutamate (also known as glutamic acid) and cysteine. The first two proteins are plentiful in foods, but cysteine is not. Cysteine is found in milk and eggs and leafy green vegetables. But once the foods are heated, the cysteine activity is destroyed. Since we do not drink raw milk or eat raw eggs (and couldn't eat enough, anyhow) and cannot consume bushels of raw leafy green vegetables daily, our bodies are deficient in cysteine. *Cysteine deficiency equals glutathione deficiency*, for without enough cysteine, it doesn't matter how much glycine and glutamate is present in your cells -- *your body can't produce glutathione.*

What about glutathione and cysteine supplements?

They do not work. Don't be fooled into taking them. Glutathione is made *in* your body *by* your body. Though so-called glutathione supplements exist, glutathione cannot be taken as a supplement. The molecule is *too large*. As stated above, your body produces glutathione from three proteins, one of which is cysteine, and cysteine is deficient in our diets.

Cysteine supplements don't provide cysteine in a form your body can use to manufacture glutathione. **Glutathione and cysteine supplements are a waste of money.** (Remember this when a person or an advertisement tells you to take glutathione and/or cysteine supplements.) And don't take products claiming to build glutathione that contain NAC (N-Acetyl Cysteine), a powerful DRUG that can have serious drug side-effects, and should be used only in emergency situations.

Immunocal is the **ONLY** product *proven by clinical research* to safely raise glutathione levels in your body. The FDA even confirms the health benefits of glutathione and also confirms that Immunocal raises glutathione levels. The FDA site says you can reduce your hospital stay AND reduce your hospital bill by HALF. You can see this by going to <http://www.fda.gov> and typing "Immunocal" in the search box. (NOTE: Beware of "copy cat" products that cite Immunocal research and claim to do what Immunocal does. They DON'T work.)

The exact formulation for Immunocal is very specific... In fact, it is *so* specific and delicate that there were several years during Dr. Gustavo Bounous' initial 18 years of research that the product that became Immunocal stopped working. Dr. Bounous was beside himself with despair. By "chance," he watched a TV show in which he learned that cheese manufacturers had raised the temperature in pasteurization of cheese from 72 degrees to 78 degrees centigrade.

When Dr. Bounous saw this show he knew what the problem was and how to solve it. Why was this fact so significant? Because the whey used in the production of Immunocal is a by-product of cheese manufacturing. A few degrees difference in temperature had made this precious health-restoring supplement useless.

Should healthy people take Immunocal?

Absolutely YES! Dreaded diseases do not "attack us" from out of nowhere. If you want to *stay healthy* and resist the diseases mentioned earlier, you NEED glutathione in every cell of your body. When glutathione is used up in its many processes in the body, more must be produced. One envelope a day of Immunocal usually keeps a healthy person in good health and costs less than a fancy cup of coffee. If you are not in good health or are in your senior years, more is advised.

Of course, our heredity and genetic tendencies play a part in health and disease, and negative emotions and stress play a big role because they deplete glutathione. There's not a lot you can do about the former, and while we supposedly have

control over the latter, few people are able to exercise that control. For those reasons, *how well you resist disease is largely determined by your body's ability to produce a continuous, adequate supply of glutathione in every cell.*

Dr. James F. Balch, co-author of “*Prescriptions for Nutritional Healing*” (a book that sold 8 ½ million copies, and is probably the most popular nutritional book ever written) explained on a radio interview why glutathione is essential, what it does in the body and why *everyone* needs it. In fact, Immunocal is the **ONLY** nutritional supplement Dr. Balch *ever* endorsed by name. He said that if you are taking other supplements and not taking Immunocal, *you are wasting your money.* While this may be an exaggeration, it tells you that this esteemed doctor considers *continuous glutathione production* to be essential for health and healing.

As you read at the beginning of this Report, **Dr. Luc Montagnier**, the co-discoverer of HIV virus and 2008 recipient of Nobel Prize for Medicine, is so impressed with Immunocal and glutathione in dealing with *oxidative stress* that he devotes an entire chapter to Immunocal in his book.

With ever increasing environmental toxins and mental and emotional stresses, the amount of free radicals our body has to deal with continues to rise, which means *we need more glutathione production.* When free radicals deplete our body of glutathione, our immune system is automatically compromised, as there is less glutathione to deal with the viruses and superbugs that keep emerging, thanks to our overuse of antibiotics and a life-style that encourages the growth of unfriendly microorganisms.

Immunocal is for every healthy person who wants to maintain good health, prevent disease and recover quickly if they become ill. Immunocal is not just for people who are sick, it is for people who have stresses (physical, mental, emotional or spiritual) and are under time-pressure. It's for people with aches and pains or a bit of arthritis. It's for people with allergies and those who want to avoid annoying colds, sore throats and the flu. It's for people who are symptom-free and want to *stay healthy* and avoid the risks and side effects of medication and hospitalization. It's for *everyone* who wants to slow down the aging process! *Clinical studies show Immunocal increases longevity by as much as 30%.*

Some users are so impressed with how young they look and feel, they say Immunocal is not only anti-aging, it *reverses* aging! And it is far easier (and better and less expensive) to PREVENT serious illness, than to heal from it.

Concerned about the cost? Relax! Depending on the current state of your health, your investment to protect your health and prevent dreaded diseases could be as little as the price of a fancy cup of coffee a day, and far less than ½ a pack of cigarettes a day -- neither of which enhance health. Is maintaining (or regaining) your health, energy and well-being worth it? Only you can decide!

Should you give Immunocal to your pets? Yes. You may be aware that pets are getting sicker also, often developing the same conditions as their owners. Whether this is from their environment, sensitivity to owner's vibrations, their food...or something else, the fact is, they, too, often need increased glutathione production. Sprinkle some Immunocal on your pet's food. We do. Immunocal can keep your furry friend around longer. People mistake our 15 yr. old cat for a very young cat!

And on that light note, we end Part 1 of this Report!

Congratulations for reading this far. We've covered what Immunocal is, what glutathione is, why glutathione production is essential to your health and life, how your body produces glutathione, what happens when you don't produce enough, why healthy people take Immunocal, and why it's good for our pets.

Now you are ready for PART 2.

In Part 2 we are covering some very important subjects. First, however, I want to give you a break from so much technical information and tell you some of the wonderful **results people have with Immunocal.**

Then I'll explain the causes of glutathione deficiency, the interaction of free radicals, antioxidants and glutathione, what free radicals and antioxidants are, and the little known *downside* of antioxidants. You'll learn about Immunocal's unique **Reverse Modulation Effect**, which is VITAL for Cancer patients. I'll introduce you to **Immunocal Platinum** (the enhanced version of Immunocal), give you websites you can go to, and tell you how to get Immunocal at the best price.

Experience With Immunocal -- Mine and People I Personally Know

Since healing from cancer in 1994, I've been in excellent health and I had no health problems when I started taking Immunocal. However, I'm not young (at least, not according to the calendar) and I have a very hectic schedule, am often under extreme stress and time pressure and I exercise almost daily (stress and exercise produce many free radicals).

Nevertheless, I always have plenty of energy with very little sleep, have no aches and pains and don't get sick; I've never even had a cold or sore throat since I started on Immunocal. I know it's been a major contributor to my good health and strong immune system, regardless of what is going on in my life.

Several of my family members and friends are enjoying much better health since they started taking Immunocal. They have more energy and no longer have minor aches and pains. Two people had severe allergy symptoms for years, and their allergies are now gone.

A Chiropractor, a family member who volunteered at Ground Zero twice a week for a year, was suffering from *toxic metal poisoning*, caused by overexposure to the toxins in Ground Zero. This caused him to be very tired and very congested. His blood tests showed toxicity and an iron deficiency (the metals displaced the iron). In only a week on Immunocal, even while going through detoxification and eliminating a lot of mucous, his energy and vitality had been restored.

Another Chiropractor, a dear friend of mine, was diagnosed by an MRI in March 2005 to have a large "spiculated mass" on the right lower lobe of his lung. The doctor said: "*This is NOT a friendly mass.*" After taking Immunocal for 6 weeks, the mass was reduced 50%. After another 8 weeks on Immunocal, a CAT Scan revealed that it reduced to the size of his little fingernail, and the doctor said: "*You're out of the woods, it is going to disappear.*" And so it did, along with three other lesions on his lung.

A friend who was taking Immunocal while recovering from cancer worked across the street from Ground Zero. Her doctors were amazed that her tests did not show any damage from the toxins in the environment, whereas tests of people who were considered to be in good health, did. Apparently, Immunocal protected her.

Another friend, whose niece had cancer of the tongue, told me doctors said she would have to have her tongue removed. Within weeks after taking Immunocal the only thing the surgeon removed was a tiny piece, about the size of a pimple. *She still has her tongue!*

Excerpts From a Few Testimonials in My Files

- **An MD with advanced prostate cancer** refused all treatment except Immunocal. In just *8 weeks* he was free of cancer.

- **An MD with MS (multiple sclerosis)** had been in a wheel chair for 2 ½ years. Just *9 weeks* after he started taking Immunocal, he was walking again. His name is Dr. William Code, and he has since written a book of his experience.
- **A young woman had been on kidney dialysis** for two years and after only *two weeks* on Immunocal she had her *first IMPROVED* blood test.
- **A woman diagnosed with breast cancer** in May, 2004 started on Immunocal. She had a lumpectomy and refused radiation. She waited to have her blood work until October 2004, and in her words: *“When my doctor got the results he was amazed at how good it was.”*
- **A 78 year old man with Stage 4 metastasized cancer** was declared cancer free. His daughter wrote that thanks to Immunocal, he went through four or five cycles of medical treatments over the last few months and *never felt ill or nauseated.*

Concerned about Alzheimer’s? Here’s some startling statistics I read recently: At least *5.2 million Americans and 26.6 million people* worldwide currently suffer from Alzheimer’s. 50% of people over age 85 are afflicted it. Alzheimer’s is now the 6th leading cause of death in the US. By 2010, there will be *500,000 new cases each year* in America alone, and nearly one million new cases annually are expected by the year 2050. You can protect yourself and your family from this dreaded condition! **Read the testimonials below.**

The first two are about a man and woman with Alzheimer’s who had not spoken in a long time. The 3rd is about a woman with both Alzheimer’s and Parkinson’s.

- **Soon** after starting on Immunocal, the man spoke his first words in a year. He looked at his wife and said, *“I love you.”* Imagine the impact this had on her and on their life together!
- **A week** after starting on Immunocal, the woman who had not been speaking heard the phone ring and said, *“I’ll get it.”* Her daughter was stunned...and delighted.
- **In only a few weeks** after beginning on Immunocal, the woman with Parkinson’s and Alzheimer’s, stopped her violent shaking, recognized her family and was able to sing with her grandson! I saw the amazing DVD

made by her daughter, country singer Barbara Fairchild, that shows her remarkable improvement.

The above are just a few people's wonderful experiences -- some people call them "miracles!" In spite of the many lives that have been transformed or saved, remember that Immunocal is not a drug and no claims can be made for it, except that *Immunocal increases your body's production of glutathione.*

Here's a link to 2-3 minute videos of people giving their personal testimonials.

<http://www.thewellnesshour.com/teamimmunotec/video1.html>

They are short and awesome, so scroll down the video page and watch them all.

Keep in mind that it is the *glutathione* that your body manufactures that heals and maintains health. Immunocal provides the ingredients your body needs in a *usable form* so it can do what it is meant to do – *heal itself!*

What Causes Glutathione Deficiency?

In a word – LIFE! Glutathione is *depleted* by everything that creates toxicity, produces free radicals and causes oxidative stress. That includes all kinds of chemicals, drugs (recreational, prescribed, and over-the-counter -- especially acetaminophen found in Tylenol and similar drugs), tobacco (smoking and 2nd hand smoke), radiation, physical stresses and strains, electronic pollution from extra low frequencies from computers, TV, cell phones, power lines and microwaves, and known and unknown toxins and pollution in our food, water and air. In addition, "positive" things such as sunlight, exercise, and all normal metabolic processes in your body deplete glutathione.

Decreased glutathione production is also a *natural part of the aging process*. A major source of free radical damage, especially in these difficult times, is *mental and emotional stress*. For some people, this causes more free radical damage than all other causes combined.

Interaction of Free Radicals, Antioxidants and Glutathione

We know that free radicals are a primary cause of cancer, and we know that antioxidants are supposed to prevent free radical damage. We also know that the use of antioxidants is continually rising, and many people who develop cancer take antioxidants. ***Thirty years ago only 1 in 30 people got cancer; today it is 1 in 3.***

This huge increase may have something to do with how glutathione and antioxidants interact.

What are free radicals?

In simple terms, free radicals are unstable molecules that are missing an electron. (Molecules are made up of atoms, and atoms are made up of protons, neutrons and electrons.) As a result of chemical processes that take place in the body when it's exposed to various conditions and environments, such as those stated in the previous paragraph, molecules lose an electron (electrons come in pairs), and they "steal" electrons from other molecules.

These molecules now "steal" electrons from other molecules – thus starting a dangerous chain reaction of free radical damage, causing oxidative stress, inflammation and abnormal cellular changes. With ever-increasing environmental toxins and mental and emotional stresses, the amount of free radicals bombarding our bodies is constantly rising.

What are antioxidants?

Antioxidants are vitamins and other substances in food and supplements that *prevent free radical damage*, both from the *outside* (environment, food, air, water, poisons, electronic equipment, sunlight, etc.) and from the *inside* (by-products of metabolism and exercise, plus mental, emotional and spiritual stress).

Popular antioxidants are vitamins A, C and E, alpha lipoic acid, pycnogenol, and there are others. Antioxidants donate their own electrons to the free radicals, thus providing the missing electron. *The purpose of antioxidants is to stop the dangerous spiraling chain reaction caused by free radical molecules.*

Carefully and thoughtfully read the following: For antioxidants in foods and supplements to do their job effectively, *they must work in conjunction with glutathione*. When antioxidants give up electrons to free radical molecules, glutathione donates the missing electrons to the antioxidants. This recycles the antioxidants and keeps them in an active state longer, so they can be utilized by your body over and over before being discarded. By the time they are discarded, the antioxidants have no free radical activity. *Glutathione prevents the antioxidants from becoming free radicals themselves, after they give up their electrons.*

IMPORTANT: Statements like the following are *not* accurate...

"Antioxidants neutralize free radicals by donating their own electrons to free radicals, but they themselves do not become free radicals in the process. They convert free radicals to harmless waste products that are eliminated from the body before any damage is done to the body."

Why are these statements not accurate? Because the above is true ONLY IF there is enough glutathione *in* your body, produced *by* your body, to interact with the antioxidants you take and prevent them from becoming free radicals.

On January 21, 2010, I read an article that began with this startling headline in 24 point red letters -- **WARNING: Don't Take Antioxidants Until You Read This!**

Here are excerpts from the article.

“As long ago as the 1950s, antioxidants became known as miracle supplements because they ‘reportedly’ promoted good health and prevented a host of diseases, including cancer and age-related diseases. According to some estimates, approximately **50% of the adult population in the U.S. takes antioxidants on a daily basis** for this reason.”

“Here's a wake-up call: Every long-term study involving antioxidant supplementation provides proof that people get sicker -- not healthier -- when they take antioxidants. In fact, beta carotene, vitamin A, and vitamin E, taken individually or in combination with other antioxidant supplements, are associated with increased all-cause mortality.” [Source: *The Journal of the American Medical Association - based on 68 randomized trials with 232,606 participants (385 publications).*]

“Fruits and vegetables produce antioxidants for good reason -- that is, to protect themselves from oxidative stress. Without antioxidants, oxygen destroys food by combining with elements and burning them up -- hence, vitamin destruction in food (or decay) occurs.” “While antioxidants serve their purpose WITHIN a fruit or vegetable, in the human body, they only **disrupt normal oxidative reactions in the cell**. This is why they are dangerous to consume (except in the minute amounts ingested from food).”

This article confirmed what an oncologist told me 30 years ago, when I asked him if he gave cancer patients antioxidants. He said, “*No, because antioxidants seem to make the cancer worse!*” I thought he was practicing poor medicine. This article confirms his findings, though he didn't know why at the time, just as the researchers quoted in the article may be unaware of *why* (the real problem) taking antioxidants disrupts normal oxidative reactions in the cell.

Here's the real problem...When antioxidants give up an electron to free radicals, they become free radicals themselves UNLESS the body produces enough glutathione. Glutathione PREVENTS the problem because it provides the missing

electrons for the antioxidants, recycles the antioxidants so by the time they are used up, they no longer have any free radical activity and are eliminated.

However, if there is not enough glutathione in the body, the antioxidants become free radicals themselves.

“The Reverse Modulation Effect” in Cancer

“The Reverse Modulation Effect” seems to be unique to Immunocal. For the millions of people who have cancer, know people with cancer, are concerned about cancer, want to prevent cancer, THIS information may be the most important part of this Report.

It’s no secret that conventional medical treatment does not have good results with cancer. In fact, when questioned, many oncologists admit *they would not use the chemotherapy* they give their cancer patients on themselves or their families. They *must* recommend it for patients, however, because it is “protocol.” (Just as the oncologist recommended it to me, even though the tumor he removed from my colon was completely dead.)

Cancer cells are extremely resistant to treatment, both traditional and natural, because **the highest concentration of glutathione is in the cancer cells**. This is why cancer cells are so strong and difficult to destroy. Most people have cancer cells in their body from time to time, but our immune system destroys them. However, if they are not destroyed, as the cancer cells duplicate and replicate, they produce more and more glutathione to strengthen and protect themselves. (That’s why taking Immunocal *while you are still healthy* is so important!)

Normal cells know when they have enough glutathione, and they turn off production. Once the cancer cells are out of control they have *no mechanism* to shut off glutathione production – so they just keep getting stronger.

Here’s what happens when you take enough Immunocal to produce “The Reverse Modulation Effect”...

Your normal cells produce what they need to be healthy, while cancer cells produce so much “extra” glutathione that they (the cancer cells) “dump” their glutathione. It’s as if the cancer cells say, “*Oh, that’s waaaay too much; we need to get rid of all this glutathione.*” And that’s exactly what they do!

While cancer cells can't stop producing glutathione when they have enough, as normal cells do, they have a mechanism for “dumping” their glutathione when production has gone haywire. Now, because they dumped their glutathione, the cancer cells are very weak. This makes them easier to kill with chemotherapy and/or radiation, or by natural methods. Meanwhile, the healthy cells surrounding the cancer cells (and in the rest of your body) have an optimal amount of glutathione and are very strong. As a result, the immune system is able to do its job again and the organs of detoxification are able to do theirs.

Because the rest of the body's cells have optimal amounts of glutathione and are strong, most people who take Immunocal while undergoing chemotherapy and/or radiation are able to resist the damaging and painful effects of the treatments and have minimal (and in some cases, no) side effects. “The Reverse Modulation Effect” explains why Immunocal is so important for people with cancer.

People ask me if I used Immunocal when I had cancer. I didn't because it wasn't on the market, and I did not know it even existed. As soon as I found out about Immunocal, I began taking it, and so did my family. We all take it, including my granddaughter, to prevent disease and maintain good health!

Should you take antioxidants if you take Immunocal?

Causes of free radicals have been steadily increasing due to thousands of new food additives and chemicals, more environmental and electromagnetic pollution and an increase in mental and emotional stress. If your body produces enough glutathione, taking supplemental antioxidant nutrients (though not in huge quantities) is beneficial, especially since these nutrients have other important functions in the body. On the other hand, as you read earlier, taking antioxidants when your body doesn't produce enough glutathione can be a potential danger.

Introducing Immunocal Platinum

Immunocal – the only product proven to increase glutathione production -- has been Immunotec's flagship product since 1996. In 2007, Immunotec introduced an enhanced version of Immunocal called Immunocal Platinum. This is Immunocal with additional anti-aging and anti-inflammatory nutrients.

Both versions of Immunocal raise glutathione levels, your body's master antioxidant. Both work at the level of DNA to repair damaged cells, strengthen your immune system and detoxify your liver and the cells of your body. Thousands of testimonials on file are from Immunocal users, before Platinum was developed.

However, Immunocal Platinum enhances Immunocal with the addition of two formulations, **CMP™*** and **RMF**. Among the benefits of these formulations are *increased anti-inflammatory and anti-aging effects*.

CMP (Cytokine Modulating Peptides) -- Cytokines are little molecules that the immune system uses to regulate inflammation. Inflammation is recognized as one of the key factors driving the aging process and interfering with cardiovascular and neurological health. CMP modulates these cytokines to reduce and/or prevent inflammation. (CMP is a trademark of Glanbia LLC.)

RMF (Redox Modulating Formula) -- RMF was developed by Immunotec's Research and Development Team headed by Dr. Wulf Dröge, Immunotec's Sr. Vice President of Research and Development, who replaced Dr. Bounous when he retired. The major objectives of RMF are to decrease the amount of acid formed and slow down and reduce the amount of calcium lost in the body (the latter is especially important for healthy bones.)

Below are additional benefits of Immunocal Platinum:

*Platinum has increased Lactoferrin to inhibit the growth of disease-causing microorganisms.

* **CMP (Cytokine Modulating Peptides)** makes Platinum a more effective anti-inflammatory. Excellent for pain, including arthritis and joint pains, which are signs of inflammation. Plus, it reduces inflammatory processes going on *inside the body* that we are not aware of, as they don't produce painful symptoms.

*CMP assists the body to better manage normal cellular growth. (CMPs do a lot more, and if you want to know more, you can read all about them on "Google.")

***RMF (Redox Modulating Formula)** further increases the antioxidant effect, and also does the following:

*Improves the body's **metabolism of insulin**, thus helping to normalize both high and low blood sugar. While both forms of Immunocal are effective for type 1 diabetes, the addition of creatine in Platinum is more effective for pre-diabetics and type 2 diabetics

*By improving metabolism of insulin, Platinum increases energy and is more effective for weight maintenance

*Reduces acidity and increases alkalinity of cells. Helps neutralize acid production from high protein intake, which is especially important for kidney health. (Acidity contributes to toxicity and overgrowth of microbes in the body.)

*Improves mood, energy, well-being alertness, concentration and clarity.

These added benefits are why many Immunocal users, *including healthy people*, choose to take Platinum or take both versions.

The main reason to take Immunocal and/or Immunocal Platinum is to increase your body's production of glutathione. In the last 30 years the amount of free radicals our body has to deal with has increased beyond our body's ability to produce enough glutathione. We also need more glutathione for our immune system, so it can take care of the toxins, viruses and new strains of superbugs that keep emerging, thanks to our life-style and overuse of antibiotics.

Increasing your body's production of glutathione is *the most efficient and quickest way to strengthen your immune system, prevent free radical damage and eliminate toxins*. This is what makes Immunocal, in either form, unique among ALL supplements, treatments, therapies or life-style changes!

Websites for More Information

Need more information? Here are websites you can go to. *If any links below, or anywhere in this Report, don't work, copy and paste them into your browser. Some browser and computer settings interfere with links.*

Immunotec website (Immunotec is the name of the company, Immunocal is their flagship product): <http://www.immunotec.com/unlimitedvisions/>
Information about the company and their products. Includes some articles and research papers.

To see 11 of the over 70 world-wide patents for Immunocal: <http://www.gsh-booster.com/Includes/Immunocal-HMS90-ResearchInfo.pdf>

Information-intensive Immunocal website for Doctors, Researchers and Patients: <http://www.immunocal.com/unlimitedvisions/> (highly recommended)

Below are some tips to assist you on this site:

On the **Home Page** are 2 short videos – one is about **Dr. Gustavo Bounous**, the discoverer and developer of Immunocal, now retired as Director of Research and Development. The other is by **Dr. Wulf Dröge**, who was one of the foremost oncologists and anti-aging research physicians in Germany before moving to Canada to become the Sr. VP of Research and Development at Immunotec.

On Top Menu, **Select your Profile** – Health Professional, Researcher, Patient. Different topics for each profile will appear on left menu.

If you are interested in Research, click “Researcher” -- regardless of your Profile

For Glutathione Research click **Published Articles** on left menu.

Click **Immunotec Researchers** to read several articles by Immunotec researchers.

Click **Glutathione** to access over 100,000 research papers about glutathione on the pub med site. PubMed link and simple instructions to search for topic (example- “glutathione and cancer”) are on the page.

Click **Key Immunotec Researchers** on left menu to read about Dr. Gustavo Bounous, Dr. Wulf Dröge, and Dr. Patricia Kongshavn, who collaborated with Dr. Bounous for 11 years.

Now For a Very Quick REVIEW...

Why is glutathione essential?

When the cells of your body don't produce enough glutathione, your body can't maintain a strong immune system, detoxify itself properly, and prevent free radical damage. More glutathione means more energy, a stronger immune system, better health and increased longevity. Depending on your genetics, lifestyle and other factors, when you are glutathione deficient you can be vulnerable to a myriad of health challenges – ranging from annoying non-critical illness to painful debilitating chronic conditions, auto immune and life-threatening diseases, such as cancer, AIDS and deadly infectious diseases.

Why is Immunocal different from all other supplements?

Immunocal is the ONLY supplement with over 70 patents, including method of use for cancer, to replenish depleted intracellular glutathione, enhance immune system,

and exert anti-cancer effects, method of treating HIV. It is also the supplement of choice used in Clinical Research for over 100,000 research papers on GHS.

What's Next?

The purpose of this Health Report is EDUCATION – to present little-known information so people can optimize their health and well-being. This is not an advertisement or promotional letter. However, it would make no sense for me to give you all this information and not tell you how to get Immunocal, would it?

Obviously, you can “google” it on the internet, find a site and order. However, you will not know the best ordering options for *you*, or have access to my extensive knowledge of health, nutrition, GHS and Immunocal (I've written over 100 documents on the latter subject alone). With my background and years as a speaker, author, coach, consultant and trainer, I can support you in many ways. (Learn more about me at www.beverlynadler.com www.breakthroughhealth.net)

Immunocal is sold on a money-back guarantee, so ordering is risk free. It's the closest thing there is to real *health* insurance. Medical insurance is *sickness* insurance -- very expensive sickness insurance at that, which millions of people no longer have. As I write this I am reminded of a recent newspaper headline I read -- ***Solution to Health Care Reform: Don't Get Sick!***

I AGREE. So here are a few questions for you...

Are you dealing with a health challenge RIGHT NOW? If so, *wouldn't you like to find out if Immunocal can help you?*

Do you appreciate the benefits of good health, want to slow down the aging process and protect your immune system? If so, *wouldn't you want this life-enhancing natural supplement for yourself and your family?*

Are you a Health Professional? If so, *wouldn't you want to use Immunocal yourself and also offer this exclusive health-restoring product to your patients?*

Are you considering a home-based business to increase your income? If so, *would you like to consider being part of the multi-TRILLION dollar health industry, specializing in anti-aging and strengthening the immune system?*

If you answered YES to any of these questions, call me at 203-373-1943, or send an email to beverlynadler@optonline.net with Immunocal in subject Line.

I'll explain the registration and ordering options and you can choose the best one for you -- Wholesale customer (20% discount), Consultant/distributor (30% discount) or Business Builder (30% discount; includes training on building a home-based business at no cost).

Of course, if you prefer, you can go online to register and order

<http://www.immunotec.com/unlimitedvisions/>

OR call Immunotec at **888-462-3397** and listen for the extension prompts.

On line or by phone be sure to give my ID #071379 as your Sponsor. (*My company name is **Unlimited Visions** -- they won't find me under Beverly Nadler.*)

VERY IMPORTANT: If you order online or by phone, you **MUST** let me know. I can only support you with important additional information and make myself available to assist you and answer your questions, **IF** you let me know.

NOTE: *The only people who have permission to reproduce and use this Health Report are those in my Immunotec organization. If you received this Report from someone in my organization, **please be certain you are using his or her ID# to register and order, not mine.***

I look forward to hearing from you soon!

To Your Health,

Beverly
